## About Us

ComTec Systems, Inc. is a full service technology company headquartered in Vineland, NJ. We design, install and service comprehensive voice, data and video infrastructures. Our range of products extends from high tech telecommunications equipment to multimedia systems, IT solutions, security systems and premise cabling products. We are also a world leader for in-room hospitality solutions. ComTec Systems, Inc. is a partner of many global leaders such as; Honeywell, Panasonic, Dell, Airaya, NEC, Ortronics & InnView. Let us engineer, design, install and maintain *your* technology needs, whatever they may be.

## Video Surveillance Installation

Whether your facility resides in a city, suburb or rural community, the presence of crime has unfortunately become an inescapable reality. One of the most effective ways to keep your property safe is to invest in a Video Surveillance System. From intrusion detection to IP video and analytics, ComTec's integrated solutions will protect those places and people that are important to you. These solutions streamline processes and are easily managed, reducing the need for additional personnel. We provide the means to deter and detect criminal activity, respond proactively and provide investigative tools to law enforcement and security personnel to aid in the apprehension and prosecution of individuals posing a threat.

# Video Surveillance Installation

We are the leaders in the technology industry. Let ComTec engineer and design a solution that works for you. Whether you are in the market for an NVR or DVR solution, wired or wireless, using fixed or PTZ cameras, we can help you decide what meets your needs. Our custom design will allow you to:

- Choose multiple sites to be viewed from a centralized location
  - Solar designed when wired power is impractical
  - Allow defined users remote viewing access
  - Integration with Access Control & Aiphone systems
  - Design custom tours for multiple camera locations
- Certified installer for Honeywell Commercial Security Systems
  - Honeywell partner under the GSA Contract # GS-07F-9785H
  - Certified Panasonic I-Pro installer
  - Official Distributor for all Sentry Security Systems

“We are able to bring a new, fully functional security service to our residents and in doing so lay the groundwork for viewing critical security data in real-time.

Our choice of ComTec Systems as our video surveillance security supplier is a key ingredient of our success.”

*Mr. Derbin Hamler*  
Director of  
Information  
Technology  
Atlantic City  
Housing Authority

# Wireless Data Solutions

**An integrated digital solution can take advantage of wireless technologies to transmit data & voice from remote areas. In fact, wireless data transmission is sometimes the only feasible means of reaching a location. By using a wireless solution, this eliminates the need for fiber and digging trenches, both of which can be quite costly.**

**At a fraction of the cost, our wireless solutions can transmit video, data or voice with speeds of 40mb – 300mb: equivalent to 20 to 70 ground carrier T-1 lines tied together.**

**Wireless provides this bandwidth and eliminates the need for expensive reoccurring monthly access costs associated with T-1's.**

“ComTec’s wireless technology is instrumental in allowing the THA to deploy a large number of cameras in the exact locations required, an option which would have been too costly to implement solely on fiber.

ComTec’s unique technology allows real-time video to be transported wirelessly, thereby saving thousands of dollars in wired infrastructure costs.”

*Herb Brown*

Interim Executive Director  
Trenton Housing Authority

# Wireless Data Solutions

We recognize that today's electronic access management systems have to go beyond locking and unlocking doors. Today's businesses require a security solution that can give you the control and information to run more efficiently and accurately.

ComTec Systems designs, installs, and provides on-going support for all your access control needs. Options include integrated CCTV, video intercom, photo ID design & badging, elevator control, and biometrics. As a leading provider of access control, we recognize that providing our customers with customized, affordable access control systems can provide an unprecedented level of protection and cost savings to an organization.

# Access Control

- Restrict access to sensitive areas
- Track & limit access throughout your facility
- Provides a safer living and/or working environment
- Avoid expensive re-keying when a tenant or an employee leaves
- Remotely administer and control access to even thousands of facilities through one interface
- Off premise muster rally points to monitor the safe evacuation of all personnel during an emergency

# Low Voltage Wiring & Cabling

- Fiber/Gigabit
- Category 5e
- Category 6
- Rack Enclosures
- Cable Management Systems

ComTec Systems, Inc. has been providing expert cabling solutions to our customers for over 20 years. Our team of engineers can design and install the most advanced and reliable solution in the most cost effective manner possible. Each of our cabling projects are installed by BICSI certified technicians under the supervision of a Registered Communications Design Distributor (RCDD).

Our customized solutions include patch panels, patch cords, workstation outlets, cable management systems, 110 cross-connect systems and much more. We also offer engineering and technical support, system planning & training programs.

"There are too many good things to say about our marvelous system. From paging, voice mail, night service, personal messaging, ring back features, I could go on and on. We thank you all for a job well done!"

*Rhoda Saul*  
Schalick, Gressman & Repice

Partnered with one of the leading Enterprise Telephony Companies in the world, NEC; we are able to deliver the most cost effective solutions that meet your business requirements. ComTec Systems, Inc. has also partnered with Cisco, the largest data network infrastructure manufacturer in the world to provide the backbone of your network. Let us help you with integrating your phone into your desktop computer which will increase efficiency and productivity. Applications such as "Presence" allows for real time status updates of users on the system reducing missed calls by up to 70%. Receive your office VM as an email delivered to you anywhere, anytime. Work from home with your own office extension and take calls as if you were in the office.

- Traditional Phone Systems & VoIP
- Call Centers & IVR
- Multi-location networking
- Remote worker solutions
- Unified Messaging
- Computer Telephony Integration
- Paging & Intercom Services

## Telephone & Data Solutions

**ComTec Systems, Inc. has exclusive agreements with providers that can supply voice, data, internet and WAN services at both a national and international level. We can help reduce your communication costs and help manage your carrier services, bills and contracts. Telecom expenses account for the 3<sup>rd</sup> largest expense a company has. Let ComTec perform a services audit for you. It is not uncommon to find 20%-40% in unrealized savings.**

1. Review all carrier bills & cross reference to Customer Service Records (CSR's)
2. Analyze your services & rates
3. Perform a line analysis
4. Solicit bids from alternate carriers
5. Manage the carrier switch-over
6. Deploy technicians to each site to verify lines are in use as they should be
7. Manage the disconnect process of any lines that need to be eliminated
8. Perform a follow up review of your newly consolidated services
9. Continue ongoing maintenance and review of accounts every 6 months

# Carrier Services

InnView is a world-class provider of in-room entertainment, information and media services to the hospitality marketplace. Our advanced technology platform transforms your guest room television into a powerful, interactive entertainment and information portal that enhances the guest experience while increasing the hotel's revenue per room.

InnView brings guest services, *free* to guest television programming and amenity services to the guest room television, laptops, and hand held devices such as iPhones and Blackberries.

Our comprehensive technology solution empowers hoteliers with a digital, 100% HD system that transforms the guestroom TV into an interactive and profitable asset, increasing per-room revenue and enhancing the guest experience.
